Group CS - 45
Final Defense Presentation

OUR TEAM

R.D.Gihansa

M.D.D. Harshana

A.T.Pihilikumbura

S.V.P.D.T Samarasekara

Supervisor : Prof. G. D. S. P. Wimalaratne

Co-Supervisor: Mr. S.K.A. Kavinda

Co-Supervisor: Mr. Dilum Gamage

THE ISSUE AT HAND

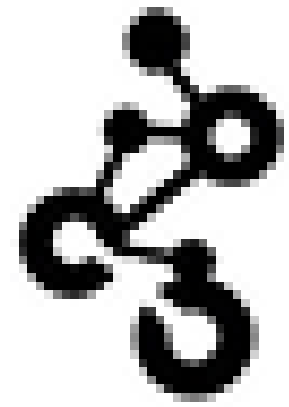

No **unified** platform for student–alumni interaction

Alumni lack **direct access** to students

UOC **needs a secure, centralized system** for verified mentorship & support

Generic platforms like LinkedIn & WhatsApp lack university-specific verification, structured mentorship & built-in aid support

MVC Pattern · 3-Tier Architecture · Client-Server Model

INTERIM COMMENTS ADDRESSED

How do you ensure mentor quality?

- Onboarding questionnaire • Rating system • Admin can remove badly-rated alumni • Badges for top mentors

Why would alumni contribute?

- Recognition & badges • Visible impact • Structured low-effort platform • Give back to alma mater

USER EXPERIENCE

Role-based dashboards

Clean minimal UI

Toast notifications

Responsive design

Accessibility support

TECHNICAL EXPOSURE

Designed a modular *MVC* system with end-to-end feature workflows

Ensured data consistency, validation & frontend-backend integration

Explored payment gateways (PayHere, Stripe) — could not implement due to sandbox limitations

Email OTP via PHPMailer · Session-based auth · Security best practices

Problem solving, testing & real-world team collaboration

TECH STACK

TESTING

We manually tested the system with over 80+ detailed test cases covering all core scenarios passed as expected

Test cases included both positive and negative scenarios.

Each feature was validated for both functionality and security.

OVERALL SYSTEM COMPLETENESS

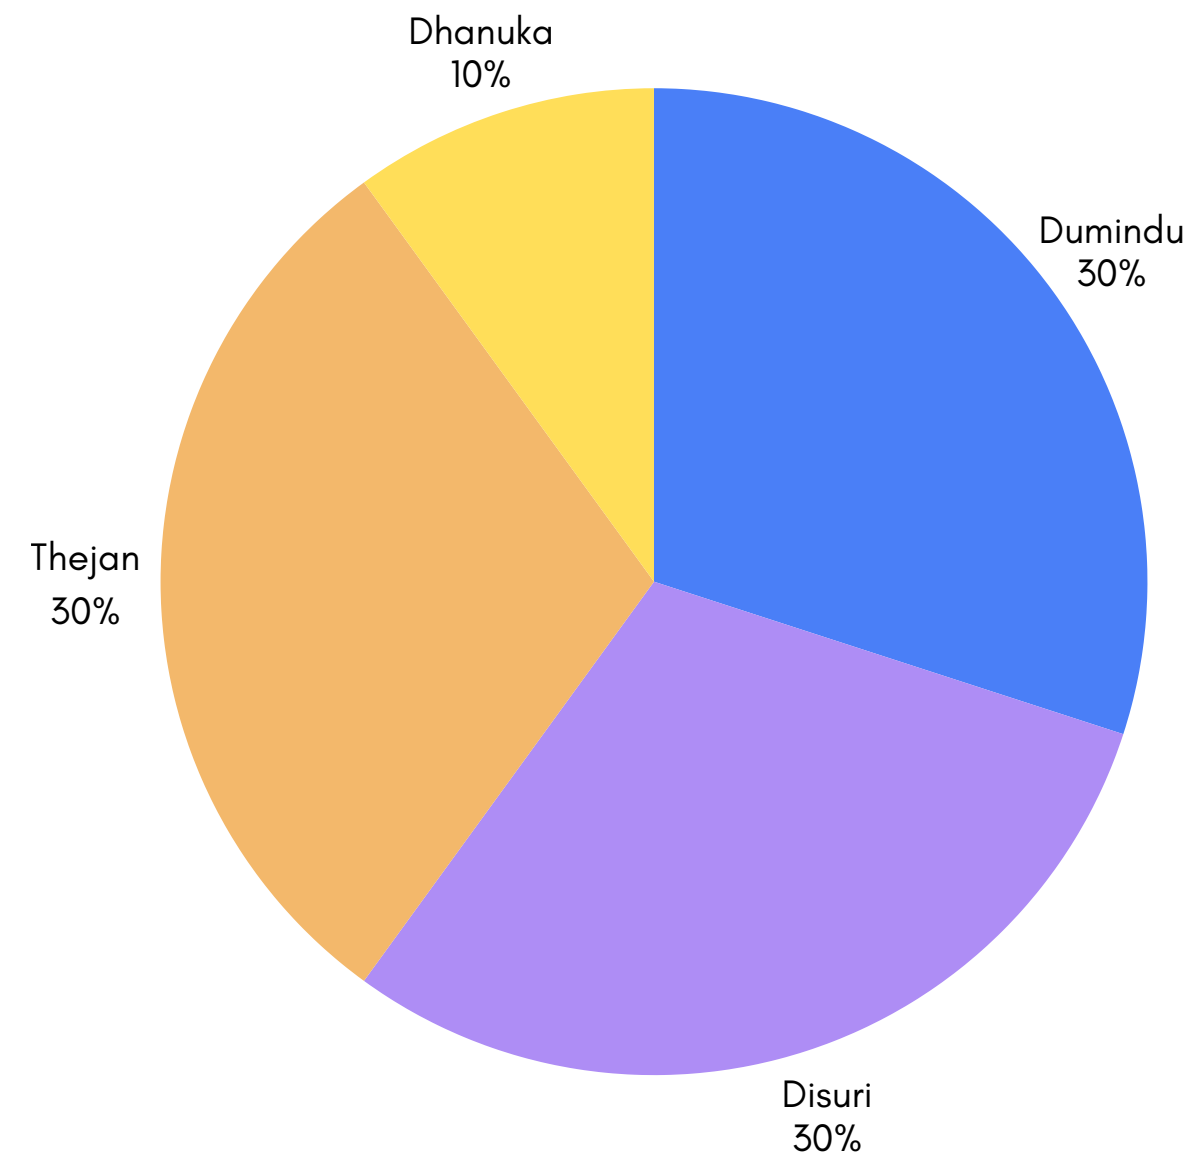

All 5 roles fully functional · 9 features implemented & tested

80+ test cases passed — functionality, security & edge cases

Counselor-verified aid flow · Gamification · Admin controls

Payment gateway researched but not implemented — sandbox limitations
